

NAVI  
TEAMISLAND

## **DESIGNED FOR PEOPLE. DESIGNED FOR GROWTH.**

Rapidly growing organizations face many challenges. They need to stay agile and innovate, in the midst of dramatic change. And this requires engaged employees. Yet managing a workplace for rapid growth can be challenging... and it often comes at the expense of worker wellbeing.

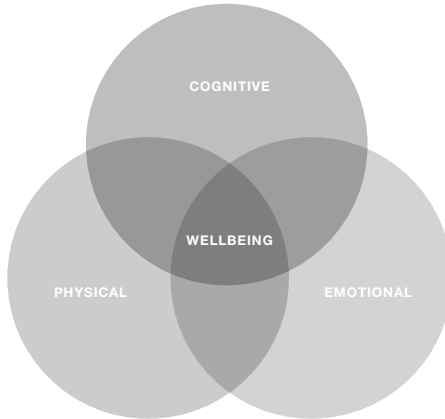

Navi TeamIsland™ has been designed for people *and* growth.

Through extensive research and insights into what matters most to workers, Navi TeamIsland integrates thoughtful design details that can enhance the wellbeing and performance of individuals and teams. And its efficient, flexible design enables organizations to change and grow—even in the most challenging real estate.

People are the greatest asset employers have. Supporting employee wellbeing enhances their engagement and effectiveness at work; the places where we work impact how we feel.

Navi TeamIsland has been designed to nurture the wellbeing of people at work, even in the most demanding environments.

DESIGNED FOR PEOPLE | WELLBEING

### Desk Height

Navi TeamIsland is available in standing and traditional desk heights, with a range of planning and leg options.

### HighSit

The unique HighSit bench enables workers to vary their postures throughout the day and have more productive face-to-face interactions. The raised, carpeted foot platform provides additional ergonomic support and comfort, similar to being in a seated desk-height position.

DESIGNED FOR PEOPLE | **EASY ACCESS**

### Flip Up

Navi TeamIsland offers easy access to technology support with integrated solutions. The door's friction hinge can be used to dock mobile technology for hands-free video, while small items can be stored neatly on the back of the door.

### Storage Leg / Bag Drop

The storage leg gives workers the ability to store and secure their personal items, creating a sense of permanence and privacy. The top of the storage leg doubles as a 'bag drop,' giving workers easy and convenient access to their bag.

### Personal Drawer

Every Navi TeamIsland with storage leg includes a personal drawer that keeps personal items within easy reach.

DESIGNED FOR PEOPLE | **COLLABORATION**

### Efficient Collaboration

Collaborative tops at the end of Navi TeamIsland create efficient, close-proximity collaboration spaces for teams, managers and project leaders. Integrated technology support provides quick and efficient digital content sharing.

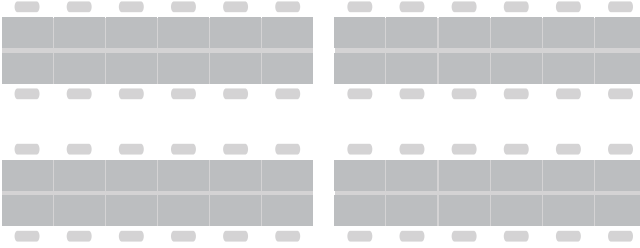

### Podium

Navi TeamIsland's unique podium supports two-person, impromptu collaboration by creating a convenient perch for quick conversations or a touchdown space during shift changes.

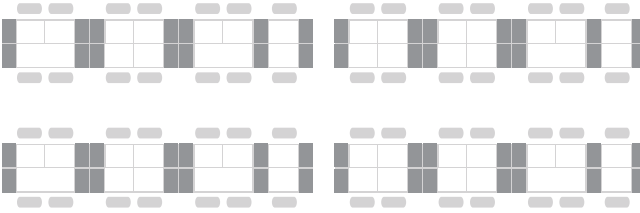

It also creates a lightweight boundary and provides storage for bags and personal items in dense environments.

Traditional Benching Application (48 people)

- 1200mm wide
- No personal storage
- Seated posture only

Navi TeamIsland Application (56 people)

- 1050mm wide
- 17% increase in same real estate
- HighSit provides options to sit or stand
- Personal storage added

Leading organizations understand that the wealth of their organization depends on the health of their people.

Navi TeamIsland enhances worker wellbeing by humanizing density through personal touches that improve their experience at work. It allows organizations to flex and evolve as their business grows.
