

# **XLOCK 30**

## **Locker and Furniture Lock**

RFID Proxy Basic 125kHz  
Fast closing and fast opening

v1.5

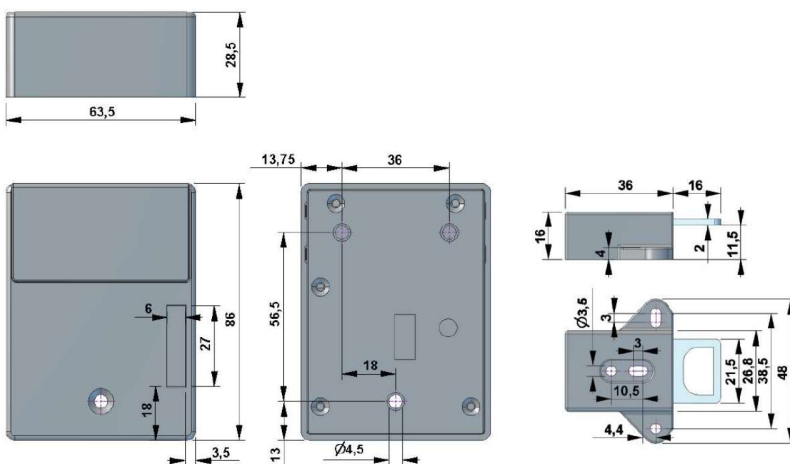

*unlock your imagination*

## Application

- XLOCK30 is a wireless furniture lock for Lockers, cupboards and drawers. The lock is equipped with 2 x AA 1.5V batteries as standard. RFID contactless chip technology is used as the "key" to operate the lock. The system is "awakened" and opened by contactless identification via an authorized UID transponder.
- XLOCK30 utilizes a fast closing mechanism whereby the user swipes their card to open the lock and it automatically locks, enabling the user to close and lock the door without using their card.
- Fixcode – program user card(s) per lock(s) using a Master Programming Card.

## Compatibility

- Contactless and invisible identification with 125kHz frequency
- Compatible only with RFID Proxy 125kHz
- 3 Programming Mastercards and 47 user cards per lock ( fixed code application )

Technical specifications of the latch lock PROXY RFID125 kHz

Mechanical specification	Weight per Set	Complete Set 200 Gramm
Electrical specifications	Equipment class as per Directive 1999/5/EC	Class 2
	HF radiation output	max. 66 dBµA/m at 10m
	Frequency band	119 to 135 kHz
	Battery type	2 x AA 1.5V
Ambient conditions	Operating temperature	+5°C bis +35°C (41°F to 95°F)
	Relative humidity operation	20% bis 75% (not condensing)

## Details

- Lock unit 86mm x 63.5mm
- Battery life – 10,000 activations (opening & closing) = 3+ years life.
- Lock system automatically disengages when battery is critically low.
- Fixcode mode only

## Inclusions

- Lock unit + bolt latch bracket
- 2 x AA Lithium batteries
- Fixing screws
- Location sticker
- 1 x RFID Proxy Basic User card
- 3 programming Mastercards (per system / project)
