# **XLOCK 80 - RFID Proxy**

## PinCode and RFID 125kHz Proxy Basic

v1.5

*unlock your imagination*

## Application

- The XLOCK80 is a wireless furniture lock for Lockers with an integrated pinpad.
- The lock is equipped with 4 x 1.5V batteries (AA) as standard. RFID Proxy contactless chip technology is used as the "key" to operate the lock. The system is "awakened" and opened by contactless identification via an authorized UID transponder.
- XLOCK80 can also be operated by using a reprogrammable PIN Code.

## Compatibility

- Contactless and invisible identification with 125kHz frequency
- Compatible only with RFID Proxy 125kHz

## Details

- Pin Code Unit 100mm x 65mm
- Lock Unit 140mm x 60mm
- Battery life – 15,000 – 20,000 activations (opening & closing) = 3-4 years life.
- An external port is included to operate the lock when the battery is low.

## Inclusions

- Lock unit + bolt bracket
- 1 x PIN Code Unit (Front mounted)
- 4 x 1.5v (AA) batteries
- Fixing screws
- 1 x RFID Proxy User card
- 3 x Mastercards per system / project
