

Steelcase

i2i™

i2i is a new collaborative seating alternative that is free of adjustments, yet has a flexing back that offers both movement and support. It accommodates a variety of postures so people can remain engaged, focused and connected. i2i enables eye-to-eye and eye-to-information, simply and comfortably.

Instant and intuitive adjustments. Our research shows that people don't adjust chairs in collaborative settings, so i2i was created without adjustments.

i2i™ earned Silver Cradle to Cradle™ Product Certification from MBDC and is up to 90% recyclable.
