

A modern, minimalist desk setup from the Steelcase Lexco Collection. The desk is white with a light pinkish-brown frame. On the desk, there is a laptop on a stand, a smartphone on a dock, a pair of headphones, a name tag that says "WU", and some sticky notes. The background features a large, colorful abstract artwork and a window with blinds.

Steelcase®

LEXCO COLLECTION

“Optimism may be the most most important job skill in the 21st century. People who can rise above fears and anxiety are the ones who can help build a culture that is better able to thrive in our world.”

Nicholas De Benoist

Steelcase Workspace Futures

Researchers at the University of California found that optimism, self-esteem and a sense of mastery is not only genetic, but that activities, relationships and the environment play a significant role in developing these tendencies.

Traditionally workplaces were designed for efficiency, and a ‘one-size-fits-all’ approach. But by giving employees choices, they gain a sense of control that helps them feel more optimistic, empowered, engaged and less stressed.

As one of six dimensions of wellbeing identified by Steelcase research teams, optimism is critical to the creative and innovative work organisations need today.

LexCo Collection is a comprehensive desking platform designed for customisation to enable greater tailored expression and bringing new personality to the workspace.

Cultivate Optimism

See the bigger picture. Explore ideas. Be open to others. Take more risks. Optimism is critical to the type of work that organisations need today: creativity and innovation. Stimulate optimism through workplace design that offer individuals choices, control and customisation, with settings that empower your people in their work.

Encouraging Experimentation

LexCo Collection encourages new creativity. Countless configurations and an expressive palette of finishes offer unmatched potential for co-creation and personalisation. Designers can combine different leg designs, accessories and levels of privacy.

Stance Leg Design

Designers can now select from a broad range of leg options with various paint finishes. The latest stance leg design features a unique bridge like construction with contoured vertical lines anchored from a structural cross bar.

Couplet Screens

Privacy screens can be positioned or removed freely, offering individuals the ability to find the focus they need or open the team bench up for a collaborative session.

Rolling Hills Art Screen

Wave Art Screen

Custom Screens

New custom printing capabilities offer designers endless opportunity for unique, creative expression in dual layer PET Screens.

Our rolling hills and wave art thematics have been designed for inspiration.

Canvas for Teams

A diverse landscape of settings hosts a range of team types and work styles. More than that, LexCo Collection invites teams and individuals to express their own identity and control levels of privacy as they switch between work modes, inspiring creativity and autonomy, boosting engagement and a sense of belonging.

Common Ground

LexCo Collection's unique Common Ground is an elevated toolbar that runs centrally along the bench, with functionality and expression that connects the whole team. The trench offers power and USB charging from any position on the bench.

Place or remove couplet screens, layer personal and shared worktools, introduce greenery or establish a team library – Common Ground’s expressive and practical accessories personalise the setting.

Name Tag and Slant Shelf

Marker Board

Bookends

Planter with Drip Tray

The Influence of Nature

Place planters at any point along the toolbar. Studies show that tasks performed under the calming influence of nature are performed better and with greater accuracy.

Monitor Arm

Headphone Organiser

Split Shelf

Easy Power Access

Instant Charging

The above-desk runway track provides power sockets and USB charging for access from any position on the bench.

Platform for Growth

Those in the business of workplace design understand the powerful influence of place, on talent and performance. Desking remains a hardworking office essential, that can be enhanced with thoughtful personalisation.

LexCo Collection is a tested platform that can be scaled with an organisation. Its robust understructure forms the foundation for a beautiful and varied landscape, tailored to suit your organisational culture.

Cable Management

Facility professionals can choose from two tray options in metal or PET construction.

Enhanced Comfort

Movement and changing posture throughout the work day supports wellbeing and positively impacts productivity.

A bench at drafting height lets people sit or stand comfortably, inviting seamless posture change, without interrupting the workflow.

Steelcase's unique carpeted foot platform recreates the familiar comfort and ergonomic support of working at standard desk height.

Sustainability

Steelcase has a history of innovating in the benching category, from FrameOne to Navi TeamIsland. Drawing on knowledge from these industry leading projects, LexCo Collection has been engineered with an even more sustainable approach, optimising material use. The whole collection can be flat-packed, assuring a smaller carbon footprint during delivery.

By opting for a PET cable tray made from recycled plastic bottles, you can minimise your carbon footprint with a responsible material choice that further reduces weight during shipping.
