XLOCK 80 – BLE
Mifare Classic 13.56mHz
& Bluetooth Low Energy (BLE)

v1.6

*unlock your imagination*

Application

- The XLOCK80 - BLE is a wireless furniture lock for Lockers.
- The lock is equipped with 4 x 1.5V battery(AA) as standard. Mifare contactless chip technology is used as the "key" to operate the lock. The system is "awakened" and opened by contactless identification via an authorized UID transponder.
- XLOCK80 – BLE can also be operated via Bluetooth Low Energy (BLE) by using a free app available on iOS or Android Phones.
- A network Gateway can also be established via the Android / iOS app for remote unlocking via an internet connection.

Compatibility

- Contactless and invisible identification with 13.56Mhz frequency
- Compatible with Mifare Classic and Bluetooth Low Energy (BLE)
- WiFi, 4G/5G connection required for remote operation (Network Gateway sold separately)

Details

- Lock Unit 140mm x 60mm
- Battery life – 15,000 – 20,000 activations (opening & closing) = 3-4 years life.

Inclusions

- Lock unit + Bolt bracket
- Separate Antennae for Bluetooth and RFID
- 4 x 1.5v (AA) batteries
- Fixing screws
- 3 x Mastercards per system / project

Operations using RFID Card

- XLOCK80 is compatible with MiFare Classic 13.56MHz
- **Fixcode** – program user card(s) per lock(s) using a Master Programming Card.
- **IMPORTANT NOTE:** XLOCK80-BLE is NOT AVAILABLE with the Freelocker (non allocated locker) function mode. If free allocation of lockers is required, this is available with XLOCK30 MiFlex or XLOCK40 MiFlex models, using RFID access cards only.

Android / iOS App　　　　　Web Desktop Interface　　　　　Network Gateway Terminal

Operations using Phone App
## (iOS or Android)

- Connects via Bluetooth Low Energy when a phone is within 10m of a locker.
- Connects via a Network Gateway terminal (Wifi/4G required) when a phone is beyond 10m of a locker. Terminal sold separately.
