

Cubb Tables

A distinctive range of meeting
and project tables

orangebox

Product Description

The laid-back, informal attitude that helped make the original Cubb range so popular has now been translated into great team tabling, at both work and café height.

With collaborative team tables now central to great Smartworking environments, expanding the popular Cubb range with team tabling was a natural next step. The resulting range of complementary work and café height tables shares the laid-back, informal appeal of the original Cubb range, and also offers the same high level of customisation, with a choice of timber stains, metal finishes and work surfaces.

As with the original Cubb range, each and every component of the team tables has been meticulously designed and tested to ensure that it performs its role efficiently and effectively. Tables come with a range of power and lighting options, and careful consideration has of course been paid to cable management, which sees cables running seamlessly up the legs and being concealed beneath the work surface.

Structurally smart components add to the range's architectural refinement, and can also be exploited by designers to create individual pieces of great character that perfectly match their project criteria.

Top - CUBB-RCM-05, Bottom - CUBB-RCM-06

rigorously
simple
tabling.

The tables in this collection have helped make the original
Cubb space a global favorite for the modern city professional
living at work and on the go.

At the heart of the Cubb is a simple, elegant design that is both functional and beautiful. The tables are made from high-quality materials and are designed to be easy to assemble and disassemble. This makes them perfect for use in a variety of settings, from a meeting room to a cafe.

Each table is made from a single piece of wood, which makes them easy to clean and maintain. The tables are also designed to be stackable, which makes them easy to store when not in use.

The Cubb tables are a perfect choice for anyone who wants a simple, elegant, and functional table for their workspace. They are a great addition to any modern office or meeting room.

rigorously
simple
tabling.

The laid-back, informal attitude that helped make the original Cubb range so popular has now been translated into great team tabling, at both work and café height.

With collaborative team tables now central to great Smartworking[®] environments, expanding the popular Cubb range with team tabling was a natural next step. The resulting range of complementary work and café height tables shares the laid-back, informal appeal of the original Cubb range, and also offers the same high level of customisation, with a choice of timber stains, metal finishes and work surfaces.

As with the original Cubb range, each and every component of the team tables has been meticulously designed and tested to ensure that it performs its role efficiently and effectively. Tables come with a range of power and lighting options, and careful consideration has of course been paid to cable management, which sees cables running seamlessly up the legs and being concealed beneath the work surface.

Structurally smart components add to the range's architectural refinement, and can also be exploited by designers to create individual pieces of great character that perfectly match their project criteria.

"The design personality of the first range of Cubb seating and tables was intrinsic to its success. We knew that this gave Cubb additional scope and potential, and this has now been realised with this extensive range of team tables."
Suek Pedersen - Lead Designer, on Cubb
Orangebox Design Team

Product Specification
