

**19162-1.0**

**Standard: Greenguard**  
**Product name: DELPHI**

**MEETS THE CRITERIA FOR GREENGUARD CERTIFICATION.**

GREENGUARD assesses the quantity of VOCs emissions (Volatile Organic Compounds) for furniture products, such as chairs, armchairs and sofas.

The flexible foams were tested according to the International norms UNI EN ISO 16000-9:2006 + ISO 16000-6:2011. The quantity of VOCs emissions of our polyurethane foams and semi-finished armchairs are far lower than the limits required by the GREENGUARD standards.

GREENGUARD applies to "finished" products. To achieve this certification our armchairs must be upholstered with fabric or leather that have zero VOCs emissions or quantities within the limits requested by this certifier.
