ABOUT US

gohome is a forward-thinking Australian design brand that mirrors Australia's relaxed lifestyle by creating quality, design-led and affordable products, with world-wide appeal.

Our Australian design team design award-winning products, that are as functional as they are innovative, and believe that honest, Australian design should be available to everyone!

We believe our products have their own unique identity, which has some of the relaxed DNA of the Australian lifestyle woven through fluid curves, use of natural materials and subtle hints of colour. Our designs break new ground by pushing the boundaries of each material used and their manufacturing constraints to develop hardy, timeless product that won't end up in landfill.

We design, manufacture and distribute our products to enliven residential, educational, hospitality and commercial environments.

DESIGNER

Ben McCarthy
Designer

Born in Sydney, after graduating from Industrial Design (UNSW) in 2004, his talents were recognised by the British Council, facilitating his move to the UK, where he began working for Tom Dixon. In 2007, he relocated to Hong Kong. Ben has won numerous awards for his designs as well as being promoted through solo and group shows both in Australia and abroad. The gohome relationship began with the 'Gridlock' stool, to the award-winning Launch Collection, and most recently the Hollywood Collection.

HOLLYWOOD

The Hollywood collection pays homage to the directors' chair typology – a utilitarian object amongst glitz and glamour. The collection revolves around a stackable chair and two sizes of stools with unique construction methods culminating in a seamless transition between two timber varieties (solid wood and plywood) to evoke a clean, timeless design. One of the main design features is a cut-out in the backrest that serves as a lifting point as well as a strong design element.

Design by Ben McCarthy

HOLLYWOOD CHAIR

The Hollywood chair is an all-wood stackable chair, where the strength of solid American Oak is utilised for the legs, with curved plywood the defining feature of the seat and back. The ergonomic curvature of the seat and back rest provides superior comfort not often found in a wooden chair and is suitable for residential, hospitality and commercial environments. Stackable to 4 chairs.

Colours:

Black | White | Natural Oak | Red

[See page 5 for product specs]

HOLLYWOOD COUNTER STOOL

The 650mm counter height stool has a clean aesthetic, visual and physical strength, incorporating a curved back rest. The back rest not only has a functional lifting point via it's cut out but mainly serves as a safety and comfort support. The stool also features a brushed stainless steel foot rest with hidden fixing points.
