

HELM AC

Helm AC combines a sleek, rounded form with the benefit of acoustic rated materials. The underlying robustness is offset by a soft wool-covered, thermo-formed felt shell. The pendant features both internal and external noise absorbing material to help shush open spaces. With a form that echoes the design of a Roman legion's helmet and the robustness to match, the Helm AC Pendant makes a bold statement that will enliven any space.

Available in two sizes, more than 50 exterior wool colors, contrasting stitching and a standard grey interior, Helm is designed to bring a burst of color into any environment. Offered with an outer wool cover in an exciting mix of solids and melanges across the full-color spectrum, Helm AC is dynamic with an inviting, playful character. The pendant is crafted from textural and vibrant quality wool fabrics that are sustainably made, rapidly renewable and biodegradable.
