Hybrid working made easy

HOT
BOX

Adapt

2 ways of carrying,
one complete work companion.

Made from eco-friendly, showerproof material, Adapt keeps all your work day essentials organised.

Do you have employees that work in the office, remotely or hybrid?

Have you thought about how employees move around with their belongings?

Would you like to offer work resources for each employee's work style?

At Hotbox we are here to **help you understand your employees' work requirements** and provide solutions to suit the working styles of each employee.

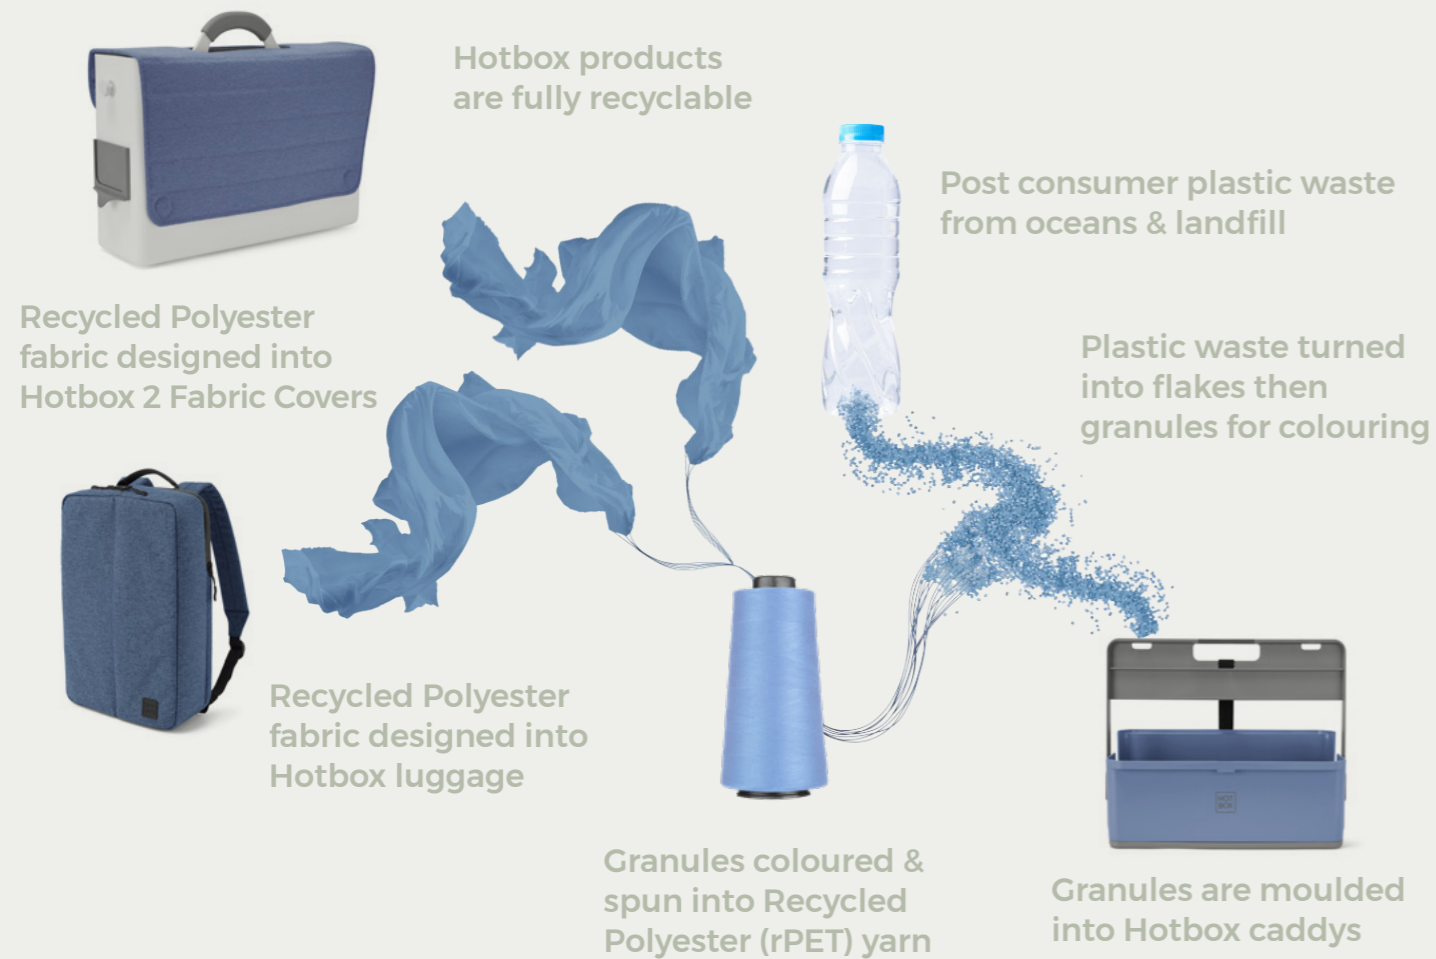

We have been **creating agile and hybrid working products since 2002**, so we know what employees need to make their working day as organised and productive as possible. **Making sure your staff's happiness and wellbeing is taken care of** so collaboration can occur naturally.

We have found through working with many brands that offering Hotbox products as part of new starter kits or as employee gifts **reinforces inclusion within a company**.

We would really like to help your organisation implement agile and hybrid working to its full potential **ensuring your employees are fully equipped to perform their roles effectively**.

Hotbox & Sustainability

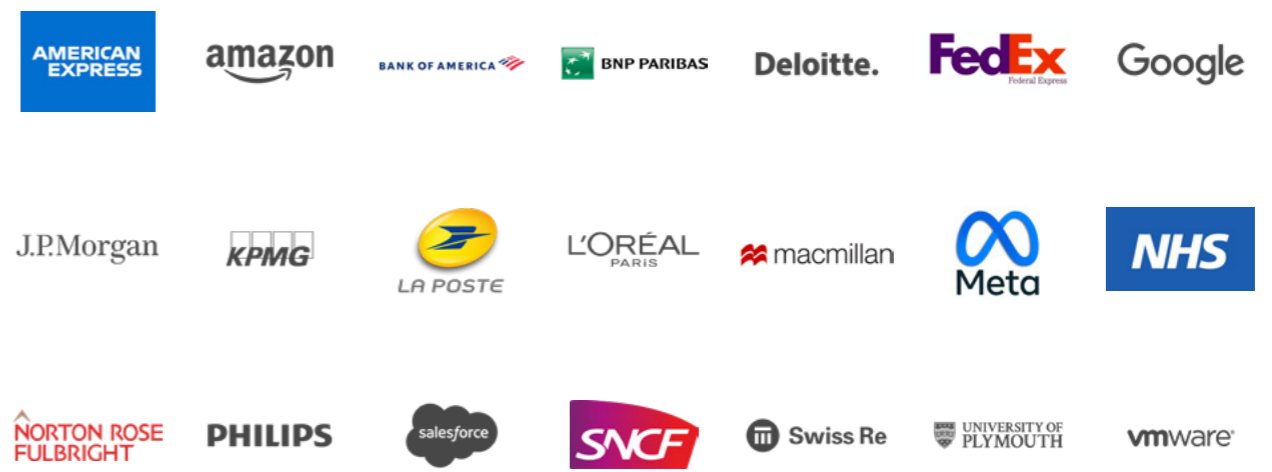

It's our mission at Hotbox to design, develop and make products that benefit people and the planet. We are committed to the lifelong journey of creating the most sustainable workspace products possible.

“In a study for Amex, Hotbox products cut the average workspace set up time by 66%”

Amex put our claims to the test, timing their employees with and without a Hotbox: The average set up time per person without a Hotbox was 22 mins per day moving back and forth between their locker, which was invariably taken during work time. **With a Hotbox it's one trip and ready to go in 2 minutes, saving 20 minutes per person per day.** Amex had 3000 people in the NY office and for the stat geeks out there that is: **60,000 minutes or 1000 hours saved per day.**

Helping Global Brands

About Hotbox

Hotbox has been at the forefront of designing products that allow brands and workers across the world make the switch to flexible working since 2002.

In the early 2000's the first hot desking tended to be in call centres where multiple shifts with multiple workers where using the same desk over a 24 hour period. This meant there was a need for a product that allowed them to keep their belongings safe, whilst moving easily between desks. Que the idea for Hotbox Origin and the journey we've been on to provide businesses across the globe with our innovative product solutions.

Since then we have successfully supplied our products to over 40 different countries around the world. Through seamless logistics, and unwavering dedication to customer satisfaction, we've established a global presence, becoming a trusted name for hybrid work products.

On The Go

All of Hotbox's products have been thoroughly thought through and designed accordingly. Our 'On the Go' hybrid luggage range are more than just laptop bags, they also turn into accessible work stations.

In the Office or At Home

Hotbox offers a wide selection of caddys in various colours to suit employees different work styles, and allowing staff to move their belongings seamlessly between their different workspaces.

Farrar & Co

Farrar & Co are a UK company offering high quality legal advice and service.

The Problem

Farrar & Co switched to hybrid working quickly during the pandemic offering the choice to their workers to work from home or from their newly refurbished offices in London. For those days where staff choose to go into the office, they need to provide a product for them to transport their belongings from the office and within the office.

The Solution

The Hotbox Shuttle was designed with the commute to and from work in mind. With two sections for both work and personal items you can easily organise all your belongings so you do not forget anything, making sure you are prepared for the day ahead.

The Results

Employees are more organised

Improved wellbeing with padded back & shoulder support

Showerproof material ensures their important tech & documents stay dry

The Product: Shuttle Backpack

Wells Fargo

Wells Fargo & Company is an American multinational financial services Company.

The Problem

When Wells Fargo made the switch to agile working just before the pandemic, colleagues found themselves swapping a dedicated desk to non-allocated desks with lockers - and it was challenging. As well as losing time moving between lockers and desks, the spots closest to the lockers were suddenly at a premium and the space felt anything but 'adaptable'.

The Solution

After distributing Hotbox 1 caddy's to their entire staff, Wells Fargo managers began to see the potential for agile working finally taking shape. Doubling as a desk top organiser and substitute pedestal drawer, the eco grey Hotbox 1 made it possible for team members to move smoothly around the office environment, defining their workspaces on their own terms.

The Results

Agile working empowered throughout the organisation

Environmental solution thanks to Hotbox 1 grey's sustainable materials

Easy integration with existing lockers & office furniture

The Product: Hotbox 1

Hotbox 4
